

WESTS ♥ THE ENVIRONMENT

At West's Group Macarthur we are committed to a stronger, more sustainable future. Check out the latest in our sustainability news in 2024.

We started a formal journey to sustainability with a Sustainability Action Plan (SAP) in early 2023 seeking to achieve the following objectives:

- We have appointed a dedicated staff member who is directly accountable for aspects of Sustainability.
- We have established a Sustainability Team
- We now include sustainability clauses within all new supply contracts.

Consolidate, rationalise and prioritise existing sustainability endeavours, and provide guidance and assurance for new opportunities to improve sustainability performance.

Minimise costs through reduced resource consumption and organisational efficiencies.

- We have established a baseline energy and water consumption, and waste generation level for review year on year.
- We have developed data monitoring tools so that we can regularly monitor data for energy and water consumption, and waste generation.
- We have developed a plan to manage and monitor poker machine electricity usage.

- We now incorporate sustainability principles into staff recruitment documentation.
- We have established relevant training modules that are accessible to all staff.

Increase staff capacity to lead and take ownership for sustainability within the workplace.

Establish a robust system for capturing, monitoring and reporting sustainability performance to stakeholders

- We have established a reporting system from our electricity broker.
- We are working on the adoption of submetering to provide more accurate and reportable metrics

IN THE LAST 12 MONTHS WE HAVE:

LIGHTING

MOVED 90% OF ALL LIGHTING TO LED AND MOVED MAJOR VENUE LIGHTING TO MOTION SENSOR

CARBON EMISSIONS

REDUCED OUR GREENHOUSE GAS EMISSIONS BY 8.9%
