

OUR SUSTAINABILITY *Values*

RESPECT FOR THE PLANET

- We reduce our environmental impact by making responsible choices every day, minimising energy and water use and cutting down on waste.
- At Wests, we're proud to deliver recreational facilities that prioritise the environment. Lakeside Golf Club leads the way with a dedicated Environment Policy and a robust Environmental Management System that aligns with ISO 14001:2005 standards.

PROGRESSIVE THINKING

- We embrace innovation and look for smarter, greener ways to do business.
- We trial, test, and adapt because progress happens one step at a time.

TEAMWORK IN ACTION

- Everyone at Wests plays a part in creating a more sustainable workplace. Whether you're behind the bar, in the kitchen, on the golf course, or in the office, we're in this together.

Better business for a better world

At Wests Group Macarthur, we want to ensure the planet is around for all of us to enjoy, not just today, but for generations to come.

Sustainability is not just a requirement, it's a responsibility. That's why we are embedding sustainable practices into everything we do, building a thriving business that's kind to our people, our planet, and our community.

COMMUNITY MINDED

- We support local suppliers, act ethically, and lead sustainability efforts in our region.
- We are committed to helping sustain the environment by targeting improvement through every venue.
- Our venues bring people together and we want that connection to include a better future for Macarthur.
